

Building Rainbows

A Simple At Home STEM Challenge!

Materials:

Any colorful materials you have such as:

- Markers, crayons, colored pencils
- Pom-poms
- Pipe cleaners
- Paint
- Clay
- Construction paper

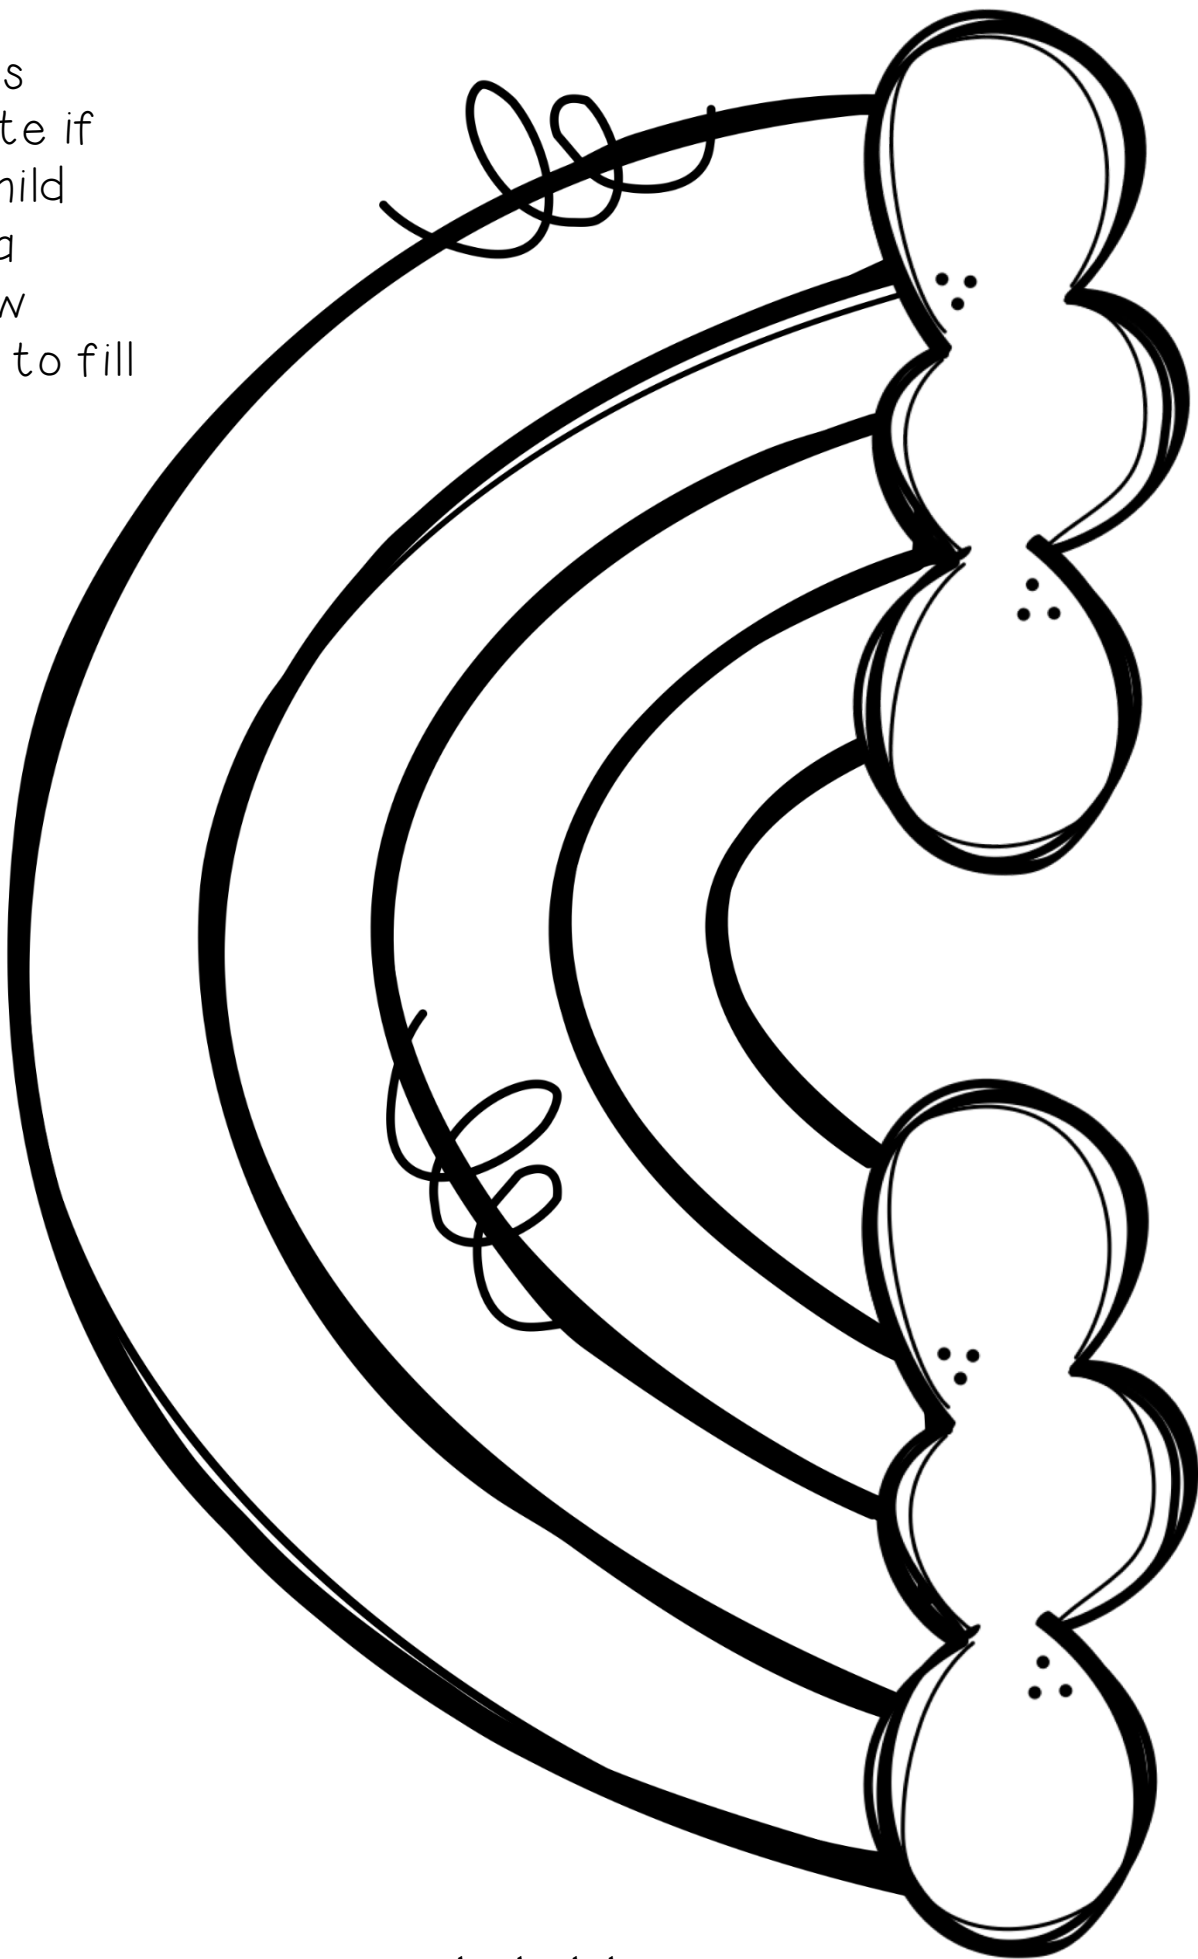

Procedure:

- Share a rainbow picture and discuss what it looks like: What shape is it? What colors do you see?
- What materials do we have that could be used to build a rainbow?
- How can we use the materials we have to build a rainbow?
- How many different kinds of rainbows can you make?

Tips:

- Allow your child time to explore with the materials first
- Step in and provide assistance as needed
- Model how to manipulate some of the materials to give your child new ideas

Use this
template if
your child
needs a
rainbow
outline to fill
in!
